Grease Trap Maintenance Requirements:

1. The FSE is responsible for the grease trap maintenance requirements set forth in, Section 122-188(e)(3) of OCCG, and must comply with the pumping/reporting frequency, which is stated on the FSE Discharge Permit and noted above **(dumpster & sand grit traps, if present at location, are to be pumped annually).**

1. Any removal and hauling of the collected materials from a grease trap, grit trap, oil-water separator, sand trap or a grease waste drum must be performed by a registered waste disposal firms holding a current registration and permit number as a commercial waste hauler under EPD rules (see list of registered waste haulers below). The collected materials shall not be returned to the wastewater system.

Grease Trap Reporting/ Record Keeping Requirements:

1. A copy of the completed manifest(s) is required to be submitted to the CCWS Grease Management Program after each service. **It is the responsibility of the FSE to submit the required manifests to the CCWS Grease Management Program on time for compliance.**

Record Retention:

1. The FSE must keep all records, reports and manifests relating to the permitted interceptor for a minimum of three (3) years. These records must be maintained on-site or in the case of dumpster traps at the office of the property management company.
