I. PREBID CONFERENCE

Minutes of the Prebid Conference held on Tuesday, August 4, 2026, are attached.

II. QUESTIONS/ANSWERS

- Q. If the power company requires compensation for transformer installation for traffic signal power service which could include poles, conduit, and wire, will the county allow a change order for this cost. It is highly unlikely for the contractor to get power company input to determine if compensation will be required. It is more unlikely to get that price prior to the bid date. This may not be an issue if dealing with EMC. Georgia Power has been the main issue.
- A. Georgia Power is not within the project limits; Cobb EMC is service provider for the existing signal and will be for the two proposed signals. Contractor will be responsible to provide electrical service points as part of LS Traffic Signal. Cobb County will coordinate with Cobb EMC and make application for power to the service points. Contractor will not be required to make payment to Cobb EMC.
- Q. Is a shuttle buggy required for the asphalt?
- A. Yes.
- Q. Project calls for 342 cabinet to be installed at two intersections. The 342 cabinet is a traffic control cabinet designed to accommodate ITS infrastructure material. They come in a 2-door design which is similar to the more common 332L, as well as a 4-door design. Can we verify the county's desired size for these locations?
- A. Four door design.
